HOME POWER

THE HANDS-ON JOURNAL OF HOME-MADE POWER

Issue #63

February / March 1998

Features

- 6 Solar Radio**
Jefferson Public Radio serves Southern Oregon and Northern California. The mountainous terrain demands many transmitters and translators to reach valley residents. Solar power provides the solution.

- 12 The Bathhouse**
You've been hearing bits and pieces about the project here at Agate Flat. Now here's the first of a series of articles you've been waiting for.... What the heck we're doing up here.

- 24 PV Naturally**
The Indian Creek Nature Center near Cedar Rapids, Iowa gets a photovoltaic system. The Iowa Renewable Energy Association (IRENEW) teaches a workshop and installs the power system for this educational facility.

- 32 Gravity Siphon Solar Hot Water**
John Whitehead designed a system where flow through the collector is driven by existing system pressure, yet cold and hot never mix. No kidding.

GoPower

- 60 Electric Porsche!**
Details of an electric sports-car conversion. Shari Prange proves you don't need to give up class or performance to go electric.
- 64 EV Perceptions**
Mike Brown discusses what are often the biggest obstacles to switching to an electric car.
- 68 Solar Sprint**
Don Kulha discusses component testing. How to make sure you are optimizing your racing performance.

Homebrew

- 42 Charge Controller**
Build this 8 amp charge controller circuit yourself. Good for PV or other current limited DC power supplies. This project is a companion to the LVD circuit in HP#60.
- 50 Passive Solar Lumber Kiln**
Dennis Scanlin and students at Appalachian State University built this energy saving kiln capable of drying 3,000 board feet of lumber. And you can too.

Cover: Todd Cory works on Jefferson Public Radio's Park Mountain translator, Mt. Shasta in the background. Story on page 6.

Columns

- 71 Code Corner**
A description of the Code writing process and how to get involved to influence the next set of changes. Also, more discussion on blocking diodes and their effect on charging current.
- 76 IPP**
Don Loweburg challenges utility company actions and agendas regarding net metering, restructuring, and distributed generation nation wide. Maine, California, Washington, and Massachusetts are only a few of the places where utility's actions seem dubious.
- 82 Wrench Realities**
Bob-O Schultze questions the decision making body of the National Electric Code (NEC). Considering who it affects and who has the experience, who gets to decide?
- 86 Open Letter**
Jim Bell writes to future generations about the decisions of the present.
- 87 Power Politics**
Michael Welch, and Redwood Alliance, begin an experiment in buying and using utility-supplied green energy. Also, the threat of the Mobile Chernobyl act.

- 90 Home & Heart**
A new Sun Frost chest freezer begins its testing at the Jarschke-Schultze residence. Also, a solar composter.
- 95 The Wiz...**
Dimensions of time, and how to get there from here.
- 105 Ozonal Notes**
Hot showers at Funky Mountain Institute and "No More Mr. Nice Guy" as Richard Perez gets tough on the Energy Establishment.

Regulars

- 4 From Us to You**
- 80 HP's Subscription form**
- 81 Home Power's Biz Page**
- 92 Happenings — RE events**
- 96 Letters to Home Power**
- 104 Writing for Home Power**
- 107 Q&A**
- 109 Micro Ads**
- 112 Index to Advertisers**
